MIT Assignment-06

Jeetu Mehra

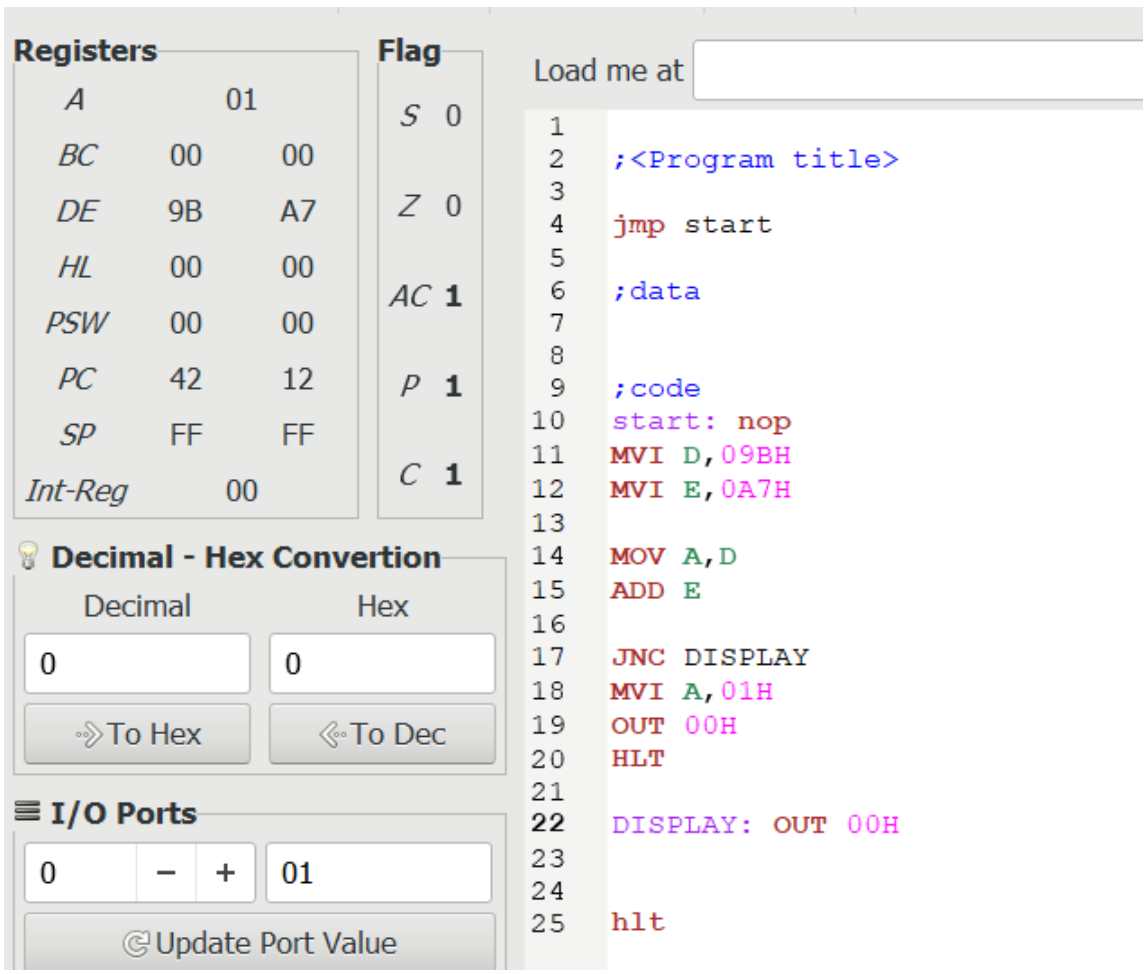
U24AI032

Question 1 : **Load the hexad ecim al num bers 9BH and A7H to reg isters D and E, resp ectively, And add**

the num bers. If result is greater than FFH , disp lay 0 1H at output port 0000 H, otherwise

disp lay answer.

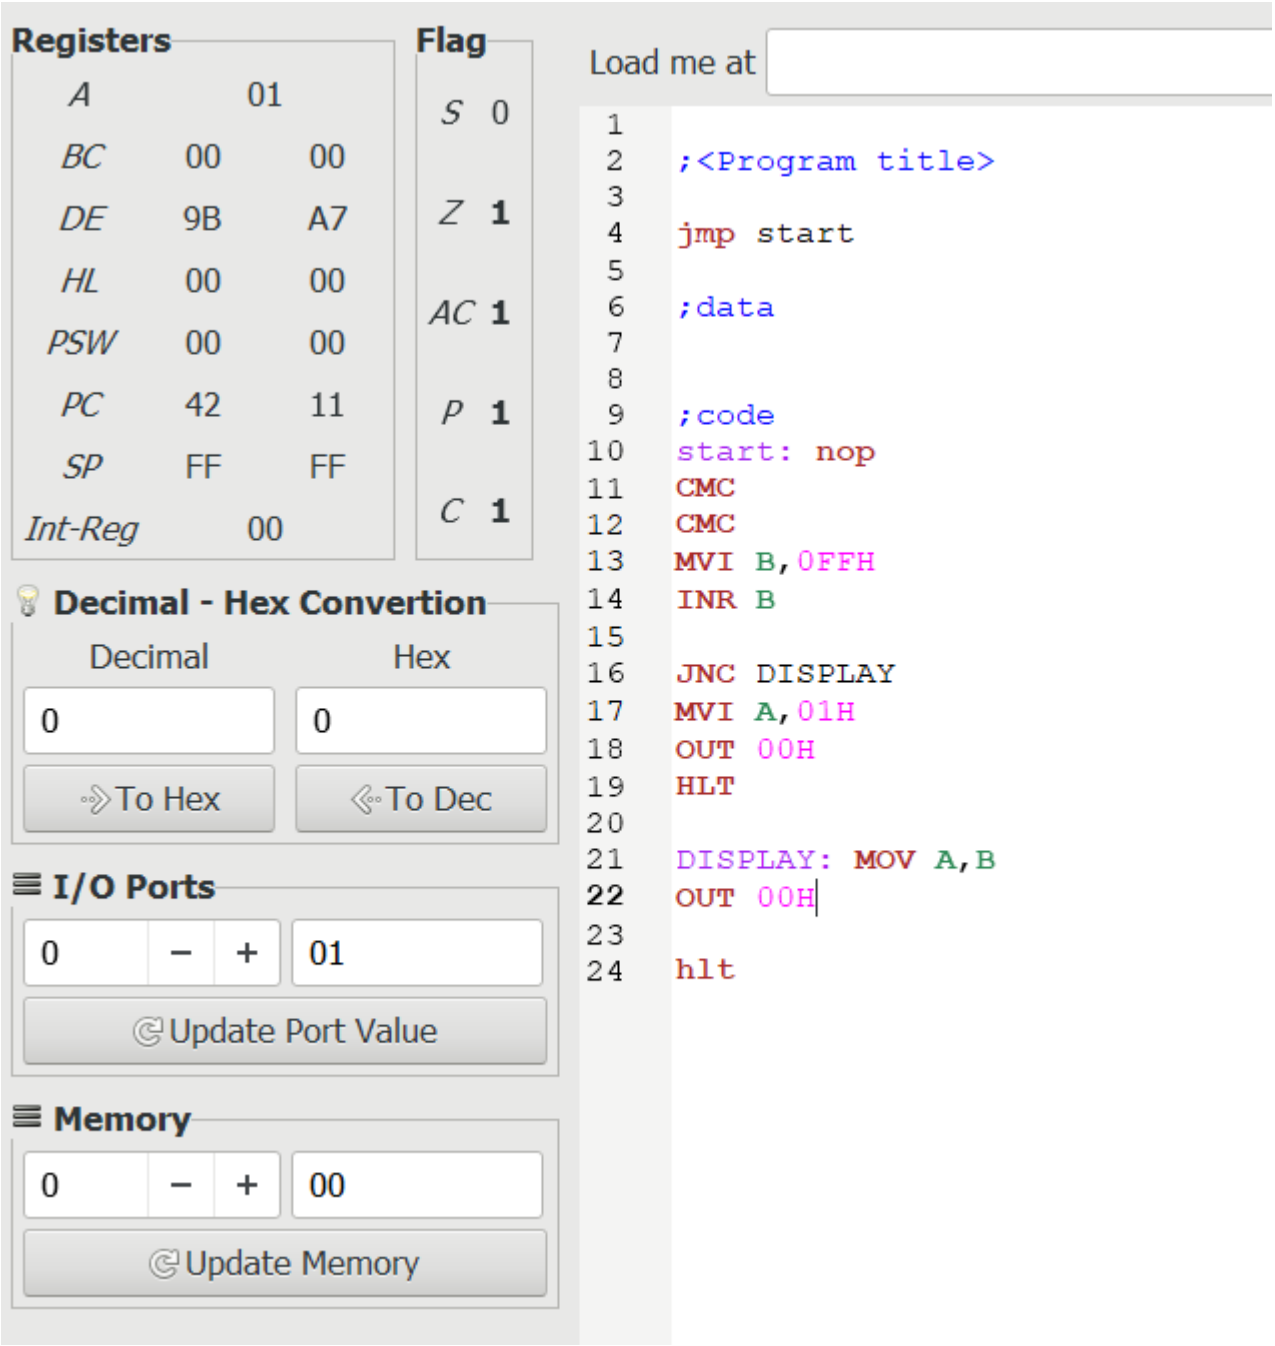
Output:



<u>Question 2</u>: Write Instruction to clear CY flag ,to load num b er FFH in B, and increment B. If the CY

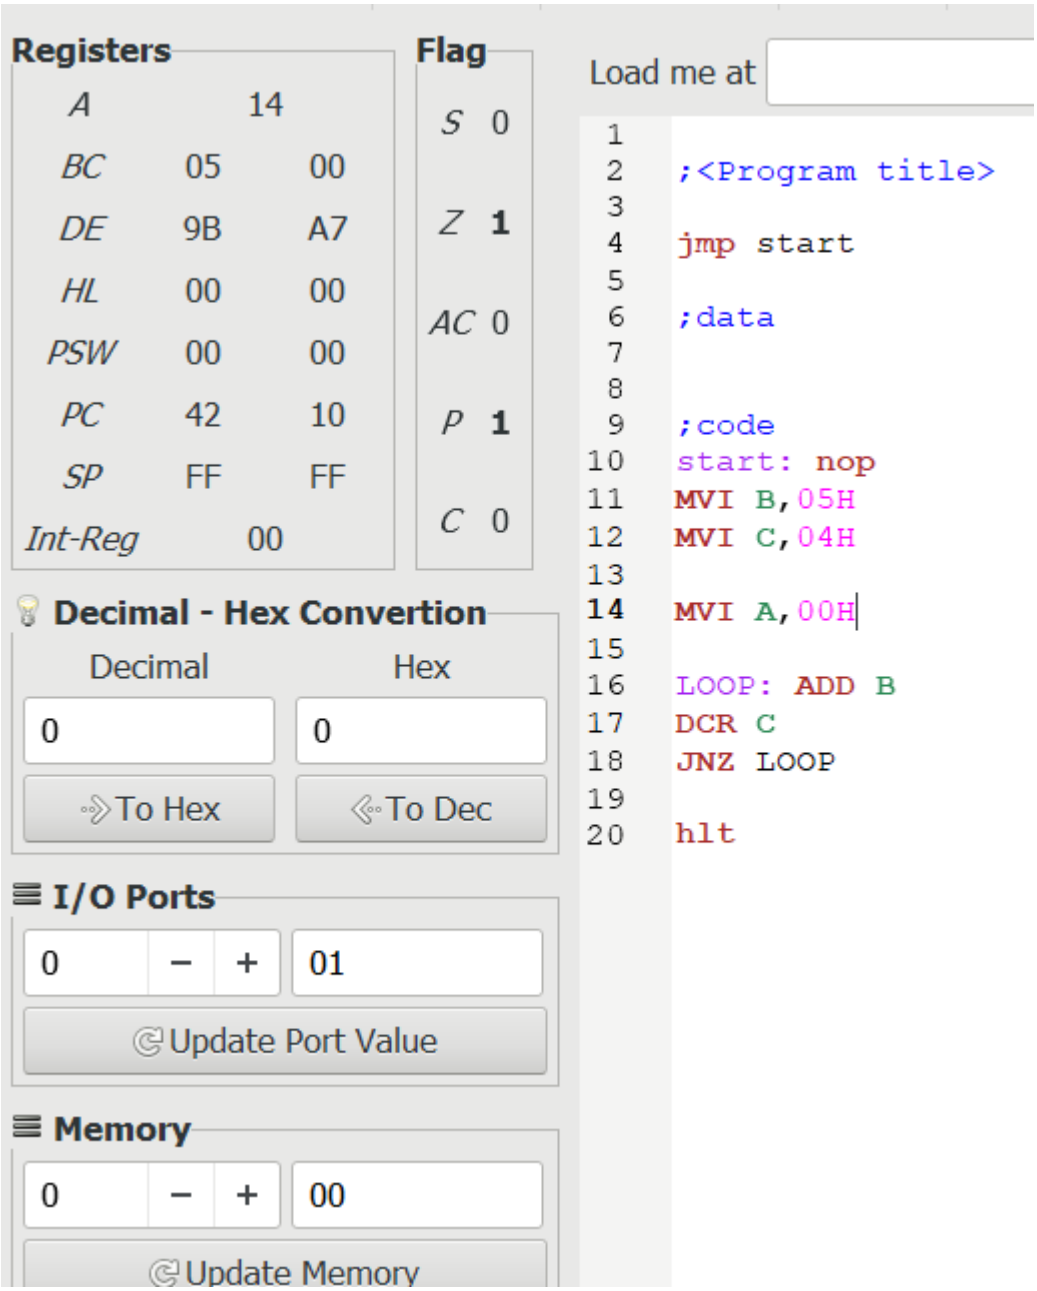
flag is set, display 01 at the output port; otherwise, display the contents of register B.

<u>Output:</u>



<u>Question 3</u>: Write a program to perform multiplication of two 8 bit numbers using bit addition method.

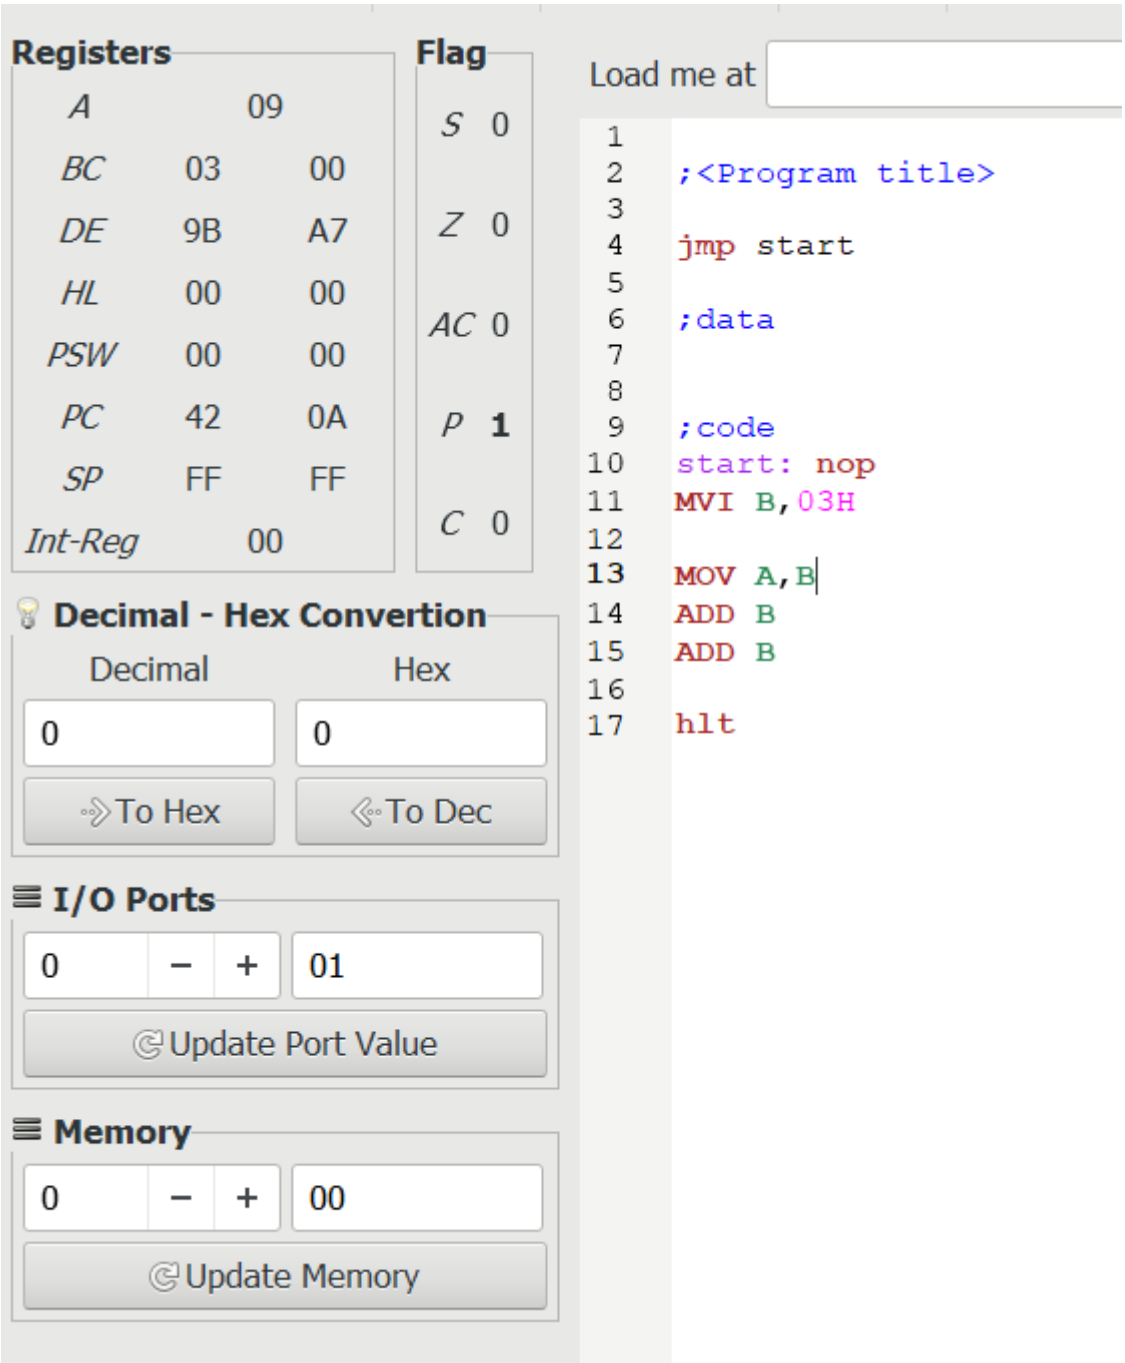
<u>Output:</u>



<u>Question 4</u> : Write a program to perform square and cube of five numbers of two 8 bit numbers using bit

rotation method.

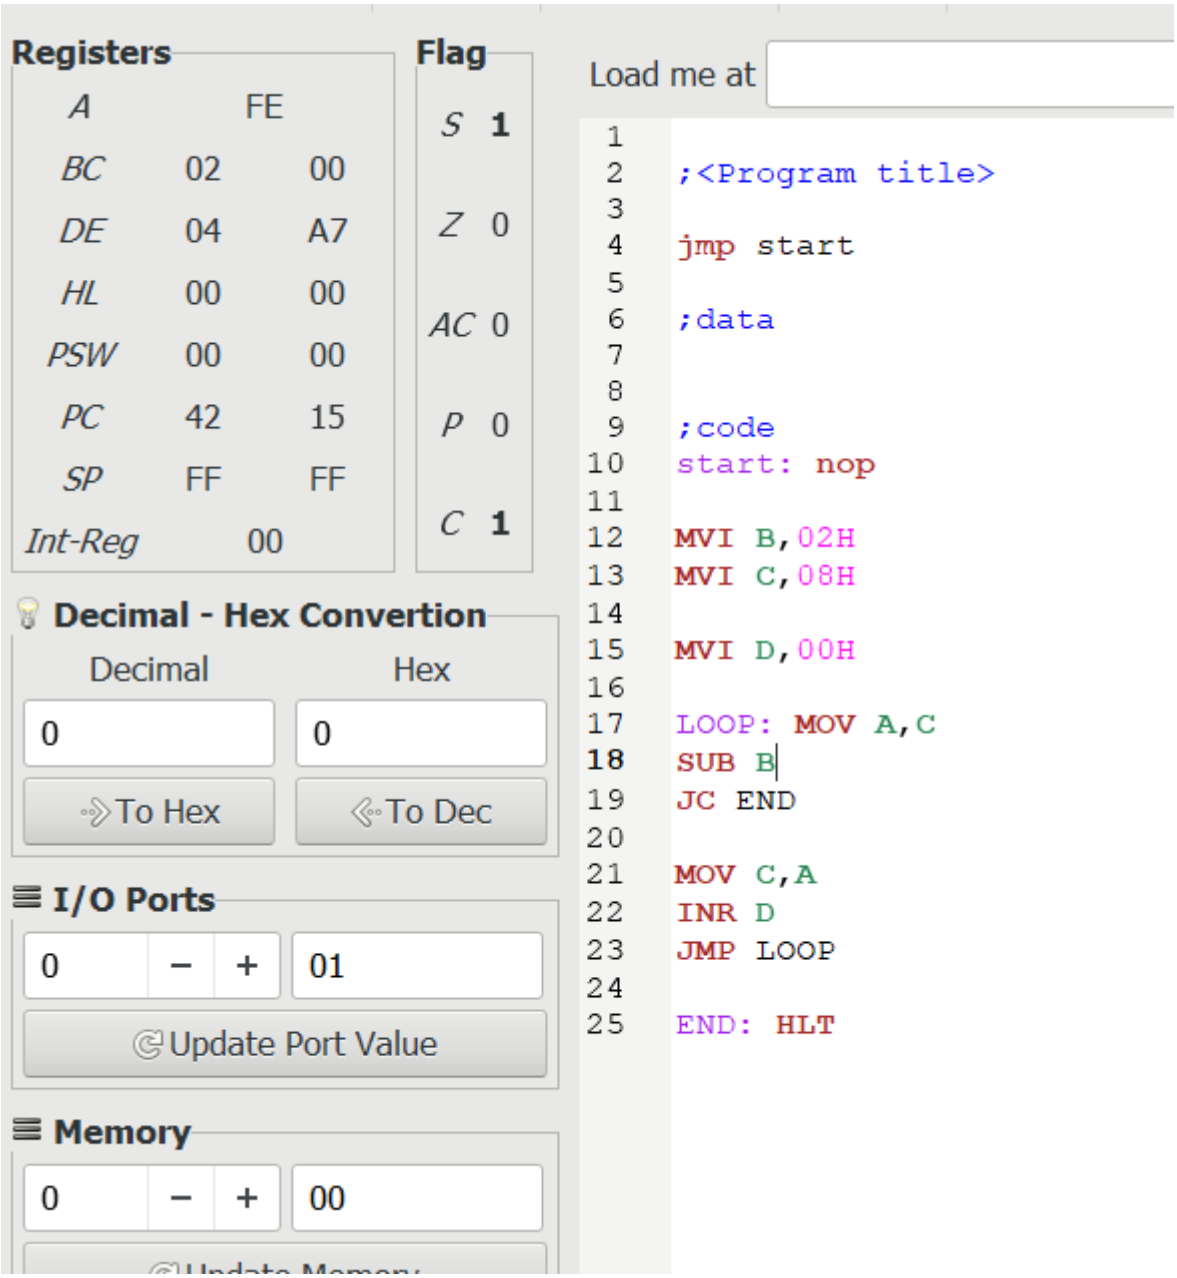
<u>Output:</u>



<u>Question 5</u> : Write a program to perform division of two 8 bit numbers using Repeated Subtraction

method.

<u>Output:</u>



<u>Question 6</u> : Write a program to perform multiplication of two 8 bit numbers using bit rotation method.

<u>Output:</u>

Registers

A	40	
BC	03	00
DE	04	A7
HL	00	00
PSW	00	00
PC	42	14
SP	FF	FF
Int-Reg	00	

Flag

S	0
Z	1
AC	0
P	1
C	0

Decimal - Hex Convertion

Decimal	Hex
0	0
To Hex	To Dec

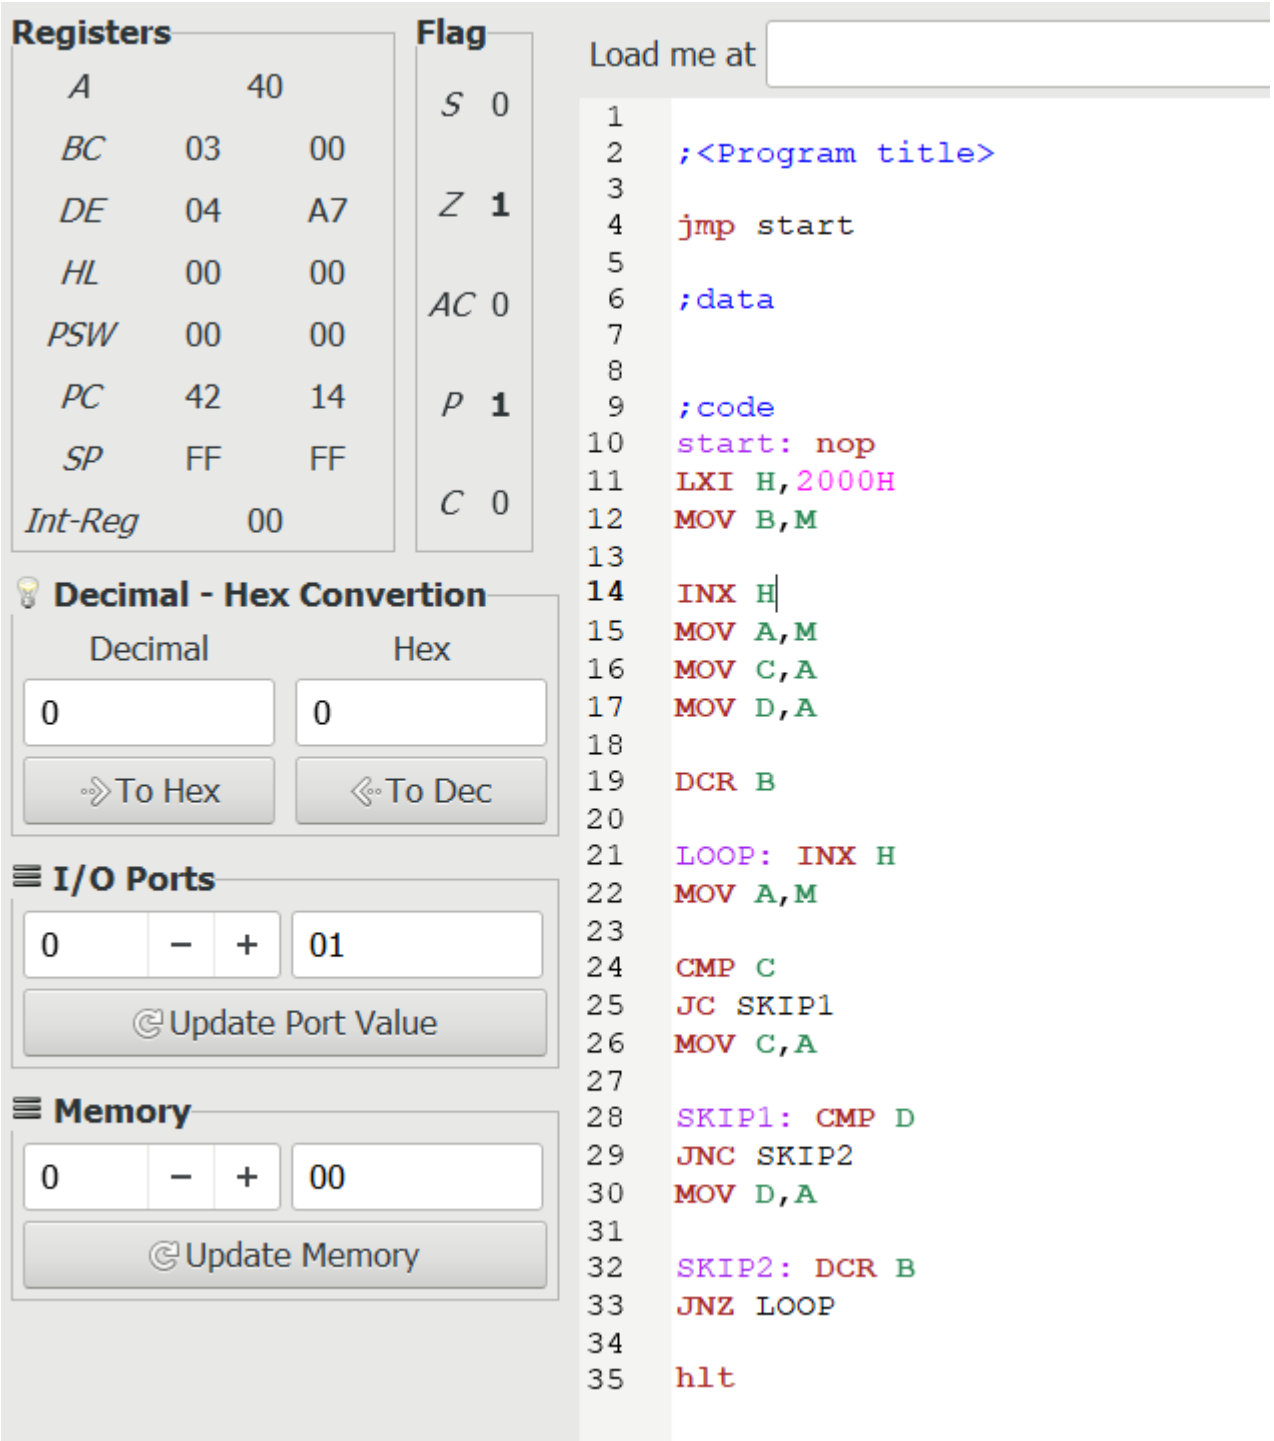
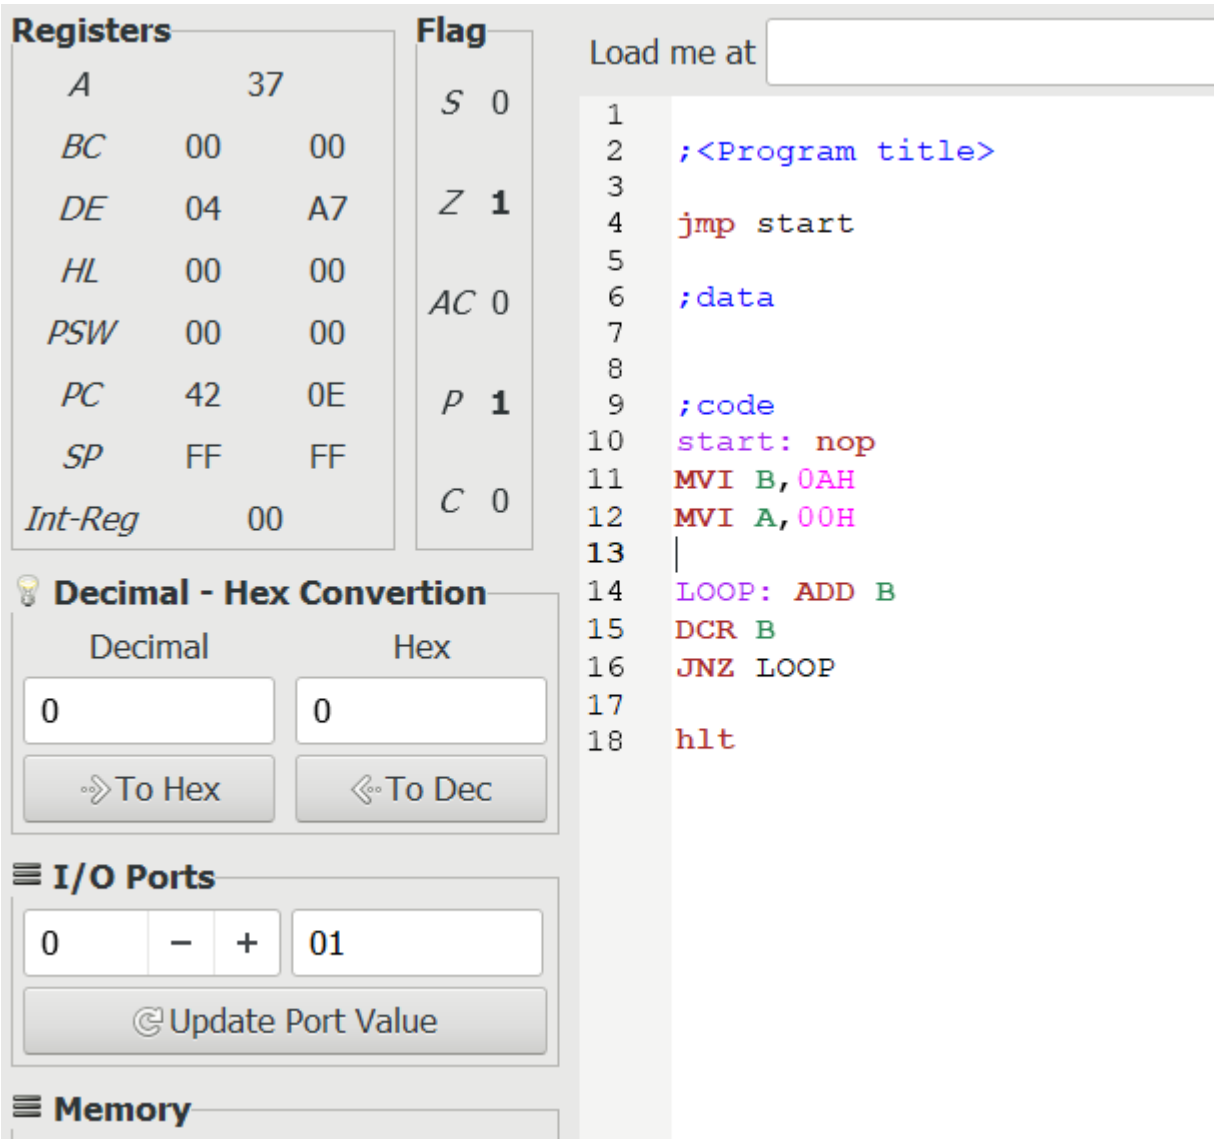
Question 7 : Finding the largest and smallest number from an array.

Output:



<u>Question 8</u> : Write a program to perform summation of first 10 numbers.

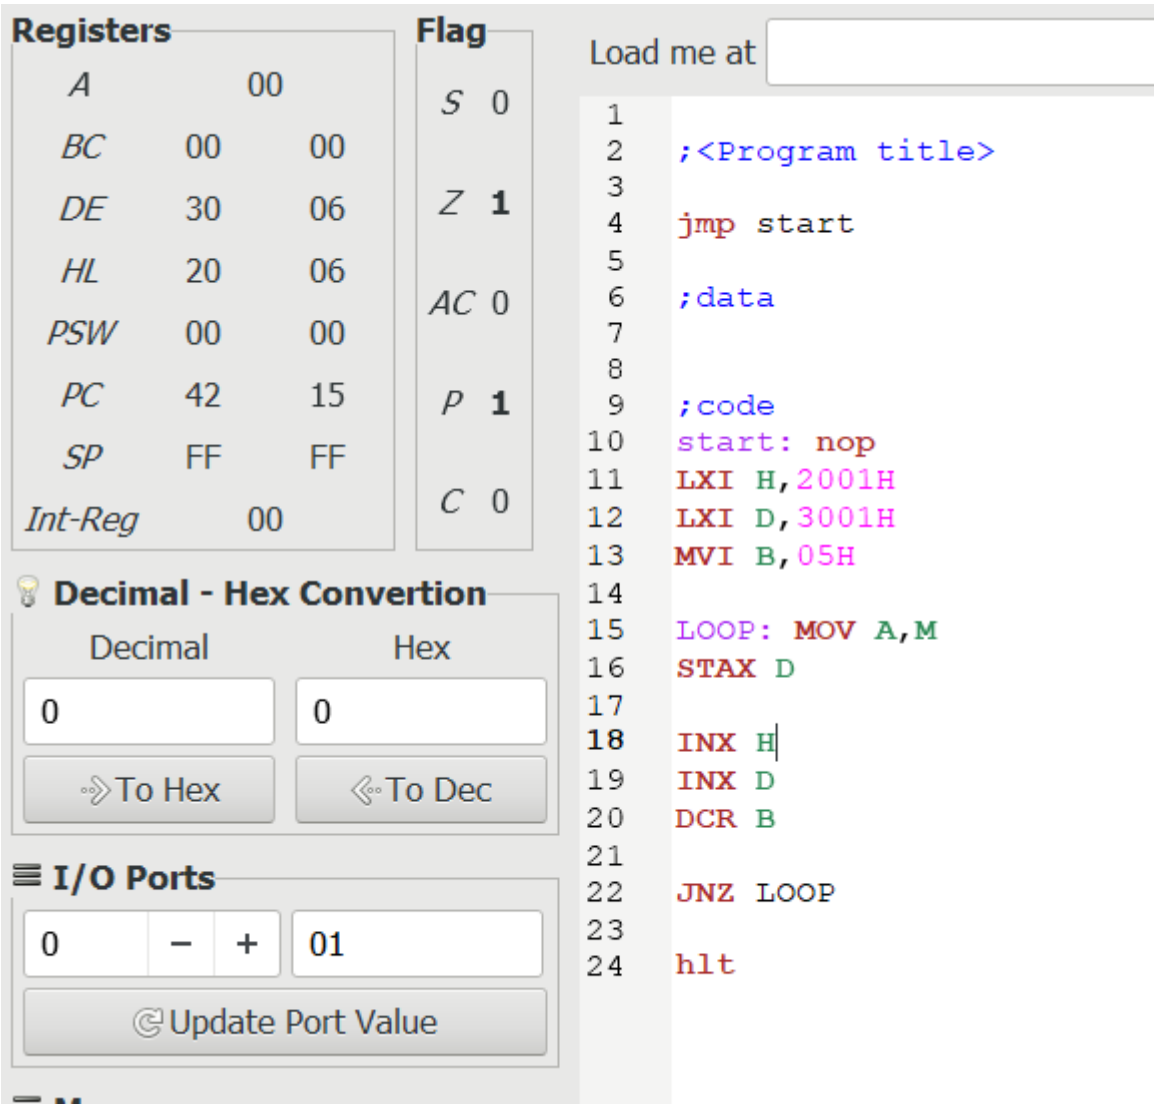
<u>Output:</u>



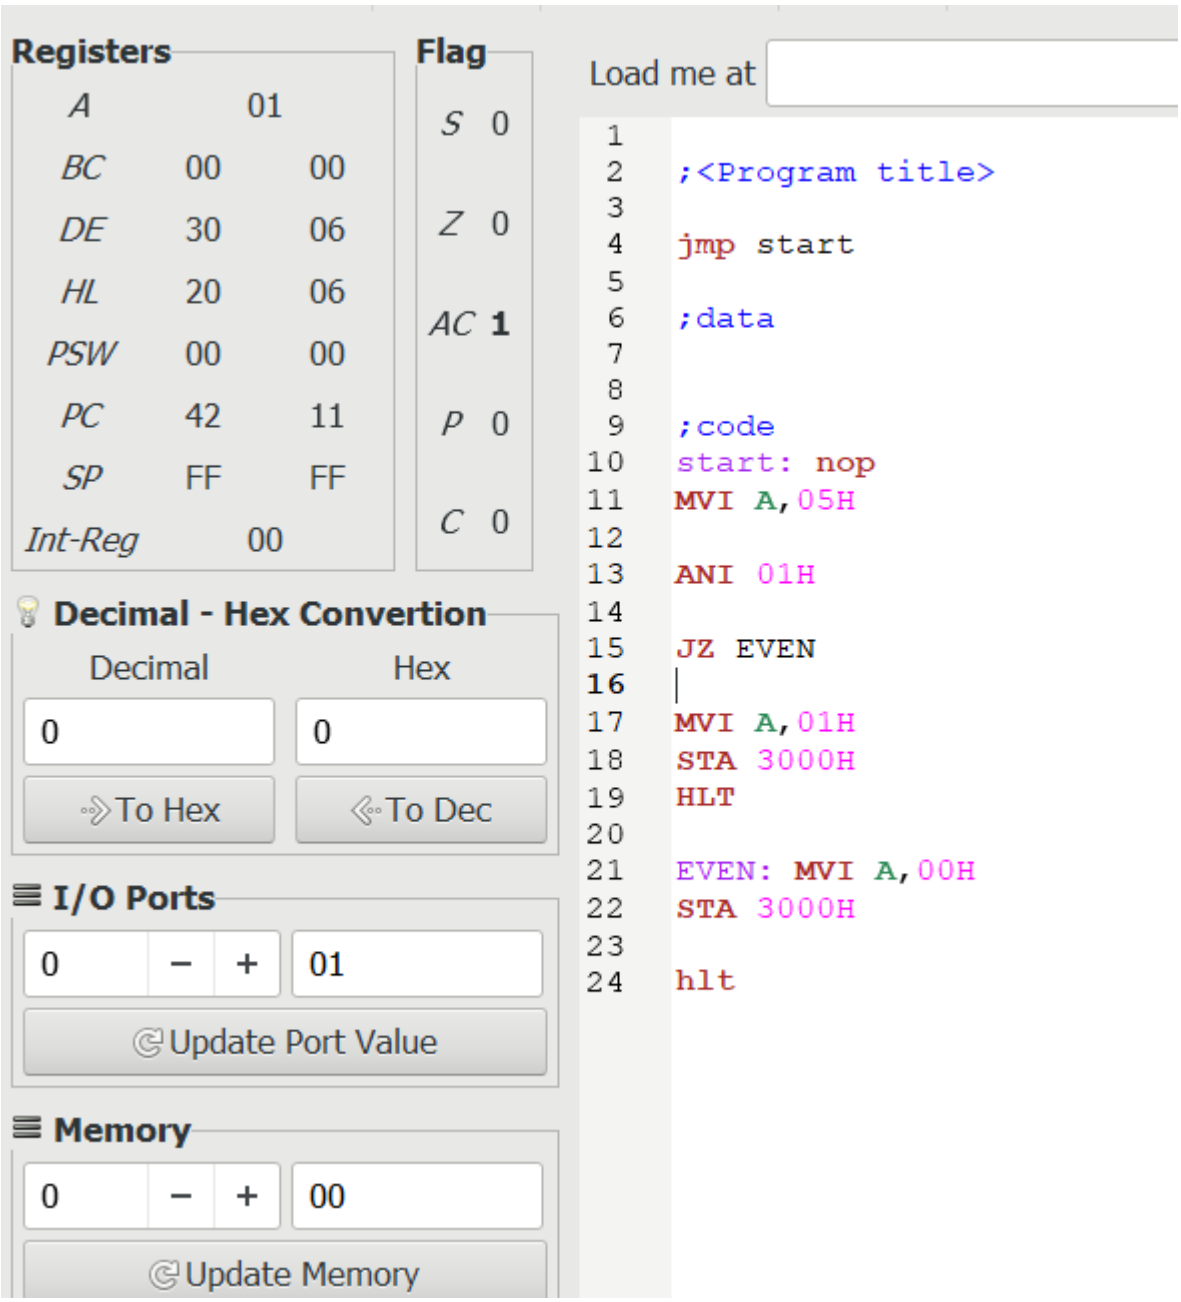
<u>Question 9</u> : Write an 8085 program to copy block of five numbers starting from location

2001h to locations starting from 3001h.

<u>Output:</u>



<u>Question 10</u> : Write an assembly language program to check if a given number is even or odd. Store 0 if the

number is even and 1 if it is odd.


<u>Output:</u>
